

Name: Jea Anyag
Course, Year & Section: BSIT 3-5

Student No.: 202306040
Date: Sept. 19, 2026

ONLINE ACTIVITY #2

Personalized Linux, and Git Cheat Sheet

Basic Linux Commands

Command	Sample Usage
pwd	pwd
ls	ls
cd	cd documents
mkdir	mkdir file
touch	touch file.txt
cp	cp a.txt
mv	mv a.txt folder/
rm	rm file.txt
cat	cat file.txt
clear	clear

Basic Git Commands

Command	Sample Usage	Description	Common Options
git add	git add index.html	Add file contents to index	git add .
git branch	git branch feature-login	To make code changes without affecting main project	git branch -a
git checkout / git switch	git checkout main	To switch branches	checkout -b
git clone	git clone https://github.com/user/project.git	To clone repository to new directory	git clone -b
git commit	git commit -m "message"	To record updated or added file	git commit -m
git diff	git diff	To show changes in commits	git diff --stat
git init	git init	Create empty repository	git init
git log	git log	Show committed logs	git log
git merge	git merge feature-login	Combine changes from one branch to other branch	git merge --abort
git restore	git restore index.html	Restore changes	git restore --staged
git status	git status	To see current git status	git status
git tag	git tag v1.0	To verify, create, delete tags	git tag -a

Three-tree Architecture of Git

Working Directory	The files you are currently editing
↓ git add	Moves selected to the changing area
STAGING AREA	Changes prepared for the next commit
↓ git commit	Saves the staged snapshot to Git history
Repository	Stores committed project history
