

Linux & Git Command Reference

1. Basic Linux Commands

Command	Usage	Description
pwd	pwd	Print the full path of the current working directory.
ls	ls -la	List files and folders in a directory, including hidden ones and details.
cd	cd /home/user/docs	Change the current working directory.
mkdir	mkdir new_folder	Create a new, empty directory.
touch	touch notes.txt	Create a new empty file, or update its timestamp if it exists.
cp	cp file1.txt file2.txt	Copy a file or directory to another location.
mv	mv old.txt new.txt	Move or rename a file or directory.
rm	rm -r old_folder	Remove files or directories.
cat	cat file.txt	Display the contents of a file on the screen.
grep	grep "error" log.txt	Search for lines matching a pattern inside a file.
chmod	chmod 755 script.sh	Change the read/write/execute permissions of a file.
man	man ls	Show the manual/help page for a command.

2. Basic Git Commands

Commands	Usage	Description	Common Options/Flags
git init	git init	Turn the current folder into a new, empty Git repository.	--bare
git clone	git clone <url>	Download a copy of an existing remote repository.	--depth, -b <branch>
git status	git status	Show which files are changed, staged, or untracked.	-s (short format)
git add	git add .	Stage file changes so they're ready to be committed.	-A, -p (patch mode)
git commit	git commit -m "msg"	Save the staged changes as a new snapshot in history.	-a, --amend
git push	git push origin main	Upload local commits to a remote repository.	-u, --force
git pull	git pull origin main	Download and merge changes from a remote repository.	--rebase
git branch	git branch feature-x	List, create, or delete branches.	-d, -a (all)
git checkout	git checkout feature-x	Switch between branches or restore files.	-b (create + switch)
git merge	git merge feature-x	Combine the history of another branch into the current one.	--no-ff
git log	git log --oneline	View the commit history of the repository.	--graph, -p
git diff	git diff	Show line-by-line changes not yet staged or committed.	--staged

“I used ai claude to get the usage and description and google for other commands”
